Ff7 remake character builds reddit

I'm playing the game right now and I'm loving it (my first final fantasy experience) and I want to know which are the best builds to use (weapons, materia, armour, accessories) + some shortcuts for each character. Hey all, about to start Hard Mode after smashing through the story last weekend. Are there any "builds" available or synergies for weapons that are mentionable? I'd like to go into Hard with a general idea on how to keep on top of my characters' strengths. Thanks! Is there any good resource online yet about optimal or interesting way to set up your party, their materia and weapon upgrades? I'm about 12 hours in and I'm still not sure how best to "build" and use each character. I like the idea of making them specialized into something and to make it useful to switch from character to character, but I'm still a bit confused. Why would I switch to Tiffa over Cloud for melee combat, for example? Is one character better than the other in some situations? What about choices of materia? I'm interested in finding more about strategies people have found to make their set of character work optimally.
